

INTOSAI WGEA 2014-2016 Work Plan

Agenda Item Overview

The current work plan period is coming to end in 2013 and we need to plan the activities for 2014-2016.

Common values of INTOSAI WGEA

Phase 1 – where would we like to go?

Before thinking of concrete activities it is useful to recollect our common values and vision future.

In order to encourage profound discussions during the meeting we encourage all the steering committee members to develop their ideas already before coming to Jaipur. Secretariat has prepared a small mind exercise that can be accomplished during the trip to Jaipur. This exercise will be sent to all delegates a week before the meeting.

Reflection and visioning session about the WGEA is planned on spot in three groups. The outcome of a small mind exercise conducted before the meeting would provide input to group discussions.

2014-2016 Work Plan

Phase 2 – What are the potential activities/projects for the next 3 years?

In order to encourage and guide the steering committee, the Chair will present the following background information:

- Regular activities (e.g. SC and WG meetings, Greenlines, survey etc.)
- Outcome of the 7th Survey of environmental audit
- Web statistics (presented during the meeting)
- Ideas sent by the SAIs

Following information presented by the chair the regional coordinators are given a floor to present their possible regional input to the work plan.

Presentations will be followed by brainstorming in groups. All suggestions will be compiled into one table by the secretariat. SC members are invited to rate them to produce a prioritised list of project ideas.

Phase 3 – involving the whole working group and adopting the work plan

Draft work plan will be presented to the whole working group before the working group meeting in Tallinn. Additional ideas will be invited during WG15. Volunteers will be welcome to come and sign up as project leaders as well as sub-committee members. Obviously, a project without a leader will drop out from the plan. Approving of the final "draft" of the work plan is scheduled at WG15. The final document will be presented to the Knowledge Sharing Committee, INTOSAI Governing Board and XXI INCOSAI.
