

Waste Management Association of Liezen

In March and April 2017, the Austrian Court of Audit carried out an audit of the Waste Management Association of Liezen (Styria). The audit aimed at assessing the organization, the legal bases and the economic situation of the association, as well as the performance of tasks. The audited area spanned the years from 2012 through 2016. Where necessary to achieve a better understanding of long-term developments, the ACA also referred to matters preceding the audited period.
